ACADEMIC THESIS (ONGOING)

Title: Fraud Detection and Prevention of Financial Crime Using Blockchain and Machine Learning

- Field: Cyber Security and Blockchain
- Details: Conducted research on addressing advanced financial crimes, such as identity theft, money laundering, and online payment fraud, by integrating blockchain and machine learning. Focused on developing a secure, transparent, and decentralized system to detect and prevent fraud in real time.

PROJECT

House Rental Management System Application

ReactJS, NodeJS, Redux, JavaScript | Web

"Prime Haven" an intuitive online platform that simplifies property rentals by connecting property owners and renters. Features include property listings, advanced search functionality, secure user authentication, and a seamless rental experience for apartments, rooms, hostels, and industrial spaces.

Eco Bazar

Next.js, TypeScript, Tailwind CSS, and Redux | Web Application

Eco Bazar - Where Convenience Meets Sustainability: Eco Bazar is an online grocery store offering a variety of products, all designed to make your shopping experience easy and eco-friendly. Built with Next.js and Tailwind CSS, the website loads quickly and looks great on any device. Thanks to Redux, the platform runs smoothly and responds quickly to your actions, giving you a seamless, enjoyable shopping experience.

Chart Craft

Next.js, TypeScript, Tailwind CSS, and Redux | Web Application

Cart-Crafter is an innovative web application, where user can customize, and manage dynamic charts and tables for data visualization and export as (PDF/image). Also has features like, messaging, and manage user's profile.

Credit Card Fraud Detection

Python

The Credit Card Fraud Detection project, developed for my university lab, uses Logistic Regression to classify transactions as legitimate or fraudulent.

TECHNICAL SKILL

Programming Skills Next.js - Python - C - HTML & CSS - JavaScript - TypeScript - Tailwind CSS
- Bootstrap - ReactJS

Graphic Designing Photoshop, Illustrator and Canva

LANGUAGE PROFICIENCY

Proficient in **Bangla** and **English**

EXTRA-CURRICULAR ACTIVITIES

- **Vice President, Green University Blood Club**
Organized many workshops, intra-university for the university level students.
- **Member - GUB Eco Warrior Club and Cultural Club (2024)**
Actively participated in environmental and cultural initiatives to promote sustainability and community engagement.

HOBBIES AND INTERESTS

Travel: Explore new places and cultures.
Cricket: Excel as a fast bowler.

Read/Write: Love books and creative writing.
Tech: Passionate about new technologies.
